

Netherlands Astronomers' Conference 2024

Tuesday, May 14, 2024

Network 1 - Lamoraal-room (9:00 AM - 10:15 AM)

time	[id] title	presenter
9:00 AM	[31] Disruptions in galactic nuclei from chaotic orbits	PENOYRE, Zephyr
9:15 AM	[32] Hypervelocity star observations constrain the Galactic Centre	VERBERNE, Sill
9:30 AM	[33] Identifying the most metal-poor stars in the APOGEE survey	MONTELIUS, Martin
9:45 AM	[34] NGC 5253: Peering into the massive star formation chemical enrichment at pc scales.	PRUIJT, Brigitte
10:00 AM	[35] Dust: using simulations to understand the evolution in observations	VAN DER GIESSEN, Stefan

Network 1 - Lamoraal-room (10:45 AM - 12:00 PM)

time	[id] title	presenter
10:45 AM	[36] The remarkable NGC 4781 MHONGOOSE triplet	KLEINER, Dane
11:00 AM	[37] Complex organic molecules in the turbulent circumnuclear disc of a young radio galaxy	MURTHY, Suma
11:15 AM	[38] JWST/MIRI imaging in the CEERS and MEGA surveys	YANG, Guang
11:30 AM	[39] Unraveling the formation and evolution of massive quiescent galaxies at $z = 1-3$ with JWST	SLOB, Martje
11:45 AM	[40] The large-scale structure around the Fornax-Eridanus Complex	RAJ, Maria Angela
